

DSM2 2.4GHz

DSX9

**DSM2
2.4GHz**

9-CHANNEL INTEGRATED DSM2 TRANSMITTER

Combining 2.4GHz DSM2™ technology with proven JR DSX9 transmitter programming with optimal features creates this impeccable radio. Additional features such as 50-model memory, ModelMatch and being compatible with all DSM2 and DSMX receivers make this model a great value. A throttle timer start-up feature has been added to the advanced functions of the DSX9 and a backlit screen also increases visibility and readability on the display and provide high grade features to this already great radio. More than ever before we urge you to try one and 'Feel the difference'.

Please note: DSM2 and DSMX Remote receivers are not interchangeable. So please use DSM2 remotes with a DSM2 receiver, and only use DSMX remotes with a DSMX receiver.

Basic Functions:

- Servo Reverse
- Left/Right Control Surface Travel Adjustment
- Dual Rate & Exponential: 2 Selections, 3 Systems
- Sub Trim
- Advanced Digital Trim: Each F.M
- Program Mixing: 6 Systems/
Inside Curve Mixing: 3 Systems Fixed 7 Points
- Trim Step
- Auto Dual Rate
- Stick Spring Adjustment
- Trainer Jack
- 50 Model Memory
- Model Names: Maximum 8 Characters
- Servo Monitoring
- Trainer System: 2 Type Selection Possible
- Type Switching: 3 Types Selection Possible
- Data Transfer
- Device Selection
- LCD with Back light

Aeroplane Functions:

- Flight Mode: Max 3 Lines
- Throttle Curve: 2 systems/7-Fixed Points
- Throttle Cut
- Gyro Sensitivity Adjust: Auto with 2 Lines
- Switch Gear
- ELEV > FLAP Mix: 2 Lines
- AILE > RUDD Mix: 2 Lines
- Flap system
- Wing, Set Type
- Twin-Engine Mix
- Servo Speed - 2 Lines

Glider Functions:

- Flight Mode: Max 5 Lines
- AILE > RUDD Mix: 5 Lines
- AILE > FLAP Mix: 2 Lines
- ELEV > FLAP Mix: 2 Lines
